

PRE-TRIP RISK ASSESSMENT

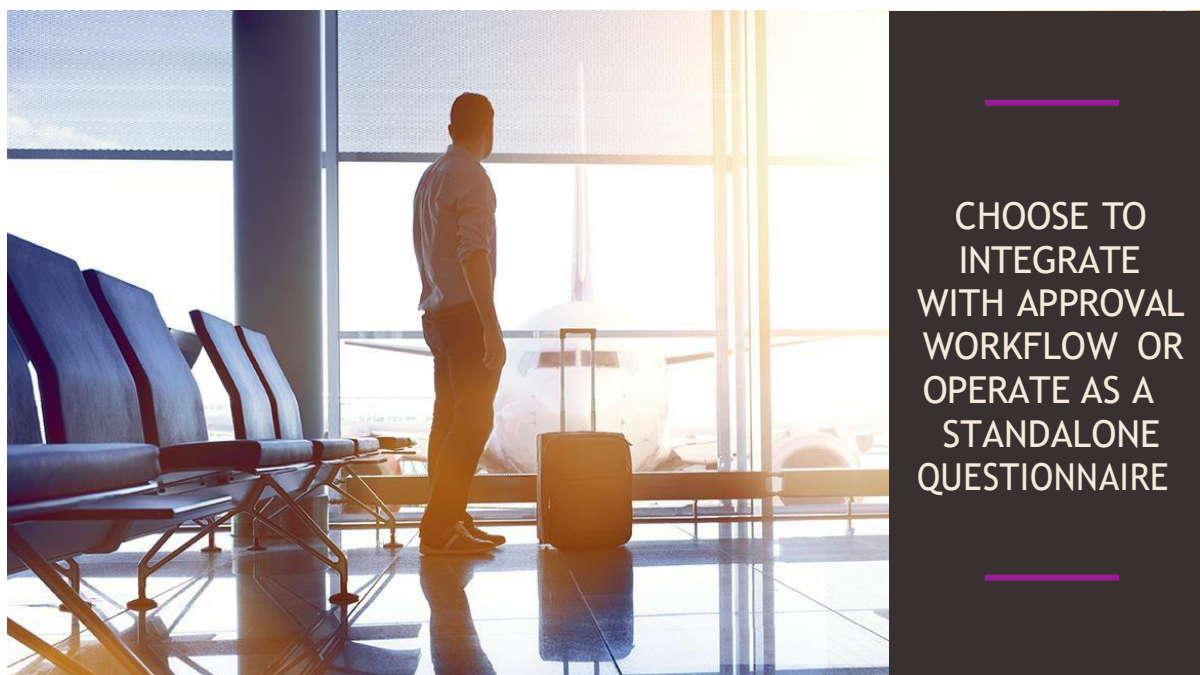

FOR ENHANCED DUTY OF CARE

Add a further layer of protection for your people and your business by highlighting key considerations ahead of travel.

Completely configurable to your company, the pre-trip risk assessment enables you to ask critical questions of your travellers, before a booking is complete. Where a booking is made on behalf of a traveller, they will receive an email asking them to accept the risk, helping them to play an active part in managing their own safety.

We will work with you to design questions that will underpin your policy; from confirming immigration requirements for re-entry, to sense checking symptoms for COVID-19 or the requirement for PPE.

Available now across R&M/Mobile, R&M/Book and through your Reed & Mackay travel team, this additional layer of security can be integrated within a full approval workflow or operated as a standalone questionnaire.

This latest development within R&M/Protect forms part of Reed & Mackay's Consultancy Services and may incur a fee
